Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 3 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 3 of copending Application No. 10/733,334. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 3 of the copending Application "anticipates" application claim 3. Accordingly, application claim 3 is not patentably distinct from copending application claim 3. Here, copending application claim 3 requires a cylinder body, a rod piston, a floating piston, a separation valve, a pressure control valve unit, a stroke simulator mechanism, a first orifice, and a second orifice while application claim 3 only requires a cylinder body, a rod piston, a floating piston, a separation valve, a pressure control valve unit, and a stroke simulator mechanism. Thus it is apparent that the more specific copending application claim 3 encompasses application claim 3. Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader

Art Unit: 3745

invention without first submitting an appropriate terminal disclaimer. Note that since application claim 3 is anticipated by copending application claim 3 and since anticipation is the epitome of obviousness, then application claim 3 is obvious over copending application claim 3.

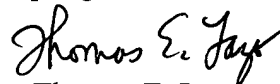

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
